reprint of the original first published in 1874 the antigenos publishing house specialises in the publication of reprints of historical books we make sure that these works are made available to the public in good condition in order to preserve their cultural heritage

jay ingram takes us on a tour of the universe and explores scientific wonders big and small

the use of lithium is increasing at breathtaking speed and is currently changing key industries and the way people live lithium is used in an ever growing number of electric vehicles evs in laptops where the battery power lasts all day on a single charge in solar panels mounted on roofs and several other uses all of which are discussed in this book the science of lithium fills a wide gap of information previously missing from other published texts dealing with the green energy revolution currently in progress it provides a comprehensive survey of information on this highly sought after element including its chemistry metallurgical properties and industrial applications as well as its drawbacks and environmental implications

first published in 1900 this is the second of two volumes of the magnum opus from pioneer assyriologist and linguist rev archibald sayce and continues directly from the first providing an introduction to linguistic roots inflectional families of speech agglutinative incorporating polysynthetic and isolating languages comparative mythology the science of religion the origin of language and the relation of language to ethnology logic and education in it sayce was the first to emphasize the principle of partial assimilation and

the linguistic principle of analogy this 4th edition ten years after the first reflected on the limitations of science revealed since 1890 in an era when languages like other humanities subjects still idealised scientific approaches archibald henry sayce was one of the greatest comparative linguists of the time being proficient in accadian arabic cuneiform chinese egyptian greek hebrew hittite japanese latin persian phoenician sanscrit and sumerian he had a good knowledge of every semitic and indo european language and could write good prose in at least twenty languages sayce s first major contribution to scholarship was a highly significant translation of an accadian seal a bilingual text from which to translate cuneiform similar to the rosetta stone here then no doubt the reader learns from a master of comparative linguistics

chock full of peculiar puzzles mind bending mythbusters and quirky questions the fifth pop science book in the bestselling science of why series is perfect for anyone curious about the weird and wondrous world we live in have you ever wondered if octopuses are from outer space what mexican jumping beans are or if banana peels are really slippery if questions like these are keeping you up at night you can rest easy bestselling author jay ingram is here to answer all the whimsical and whacky wonderings that have baffled people since the dawn of time from our bodies to our pets and other beasts to the natural world around us jay tackles science topics big and small such as did dinosaurs sit on their eggs what is our funny bone is there a specific muscle that makes dogs cute because who hasn t pondered whether plants have feelings or if robin hood was a real person or what humans will look like in the future teeming with amusing answers to bemusing questions and handy and hilarious illustrations this latest volume separates fact from fiction lesson from legend and myth from marvel endlessly illuminating and entertaining the science of why volume 5 is five times the fun for new and old readers of the series

the newest volume in the beloved science of why series full of fascinating science that will amuse and astonish readers of all ages have you wondered why you cringe when fingernails are scratched along a chalkboard or why some people are left handed or if a

shark can smell a drop of blood a mile away then you're in luck bestselling author jay ingram is back to answer all those questions and more as he explores and explains the world around us in all of its head scratching curiosity from the smallest parts inside us to the biggest questions about our universe jay tackles pressing topics such as could we use a laser to shoot an asteroid that was about to hit earth what exactly was a dodo and why did it go extinct what makes peppers spicy touching on everything from food to robots to space to the animal kingdom the science of why 3 is perfect for anyone who has stayed up late into the night pondering the weird and wonderful world we live in full of captivating science questions and answers this book is sure to surprise and delight science readers of all ages

why are most plants green why doesn't stomach acid dissolve the stomach itself why are there more tornados in the midwest than on the coast this volume answers these questions and over 200 more shedding light on the science behind them as informative as it is entertaining it addresses every major branch of science including physics chemistry biology geology meteorology astronomy and cosmology it highlights some of the big ideas that helped shape science as we know it and discusses the future of science with regards to nanotechnology genetic modification molecular medicine and string theory complete idiot's guides have a proven track record of simplifying science with great success as with volumes on physics and chemistry entertaining scientific overviews of this kind also successful including such titles as the pocket idiot's guide to not so useless facts and the complete idiot's guide to understanding einstein

the bestselling author of dogs that know when their owners are coming home offers an intriguing new assessment of modern day science that will radically change the way we view what is possible in science set free originally published to acclaim in the uk as the science delusion dr rupert sheldrake one of the world's most innovative scientists shows the ways in which science is being constricted by assumptions that have over the years hardened into dogmas such dogmas are not only limiting but dangerous for the

future of humanity according to these principles all of reality is material or physical the world is a machine made up of inanimate matter nature is purposeless consciousness is nothing but the physical activity of the brain free will is an illusion god exists only as an idea in human minds imprisoned within our skulls but should science be a belief system or a method of enquiry sheldrake shows that the materialist ideology is moribund under its sway increasingly expensive research is reaping diminishing returns while societies around the world are paying the price in the skeptical spirit of true science sheldrake turns the ten fundamental dogmas of materialism into exciting questions and shows how all of them open up startling new possibilities for discovery science set free will radically change your view of what is real and what is possible

an entertaining and digestible volume that demystifies science from the author of 16 bestselling popular science books crave answers a feast of science demystifies the chemistry of everyday life serving up practical knowledge to both inform and entertain guaranteed to satiate your hunger for palatable and relevant scientific information dr joe schwarcz proves that chemical is not necessarily synonymous with toxic are there fish genes in tomatoes can snail slime cream and bone broth really make your wrinkles disappear what s the problem with sugar resistant starch hops in beer microbeads and secret cancer cures are natural products the key to good health and what is fake news all about dr joe answers these questions and more cutting through the fat of story suggestion and social media speculation a feast of science gets to the meat of the chemical reactions that make up our daily lives

gifted science writer wolverton takes up the challenge and examines superman s powers through the lens of modern science wolverton explains the fundamental biological and genetic differences between earthlings and kryptonians that allow superman to exercise extraordinary abilities on earth
